Engineering lead with **7+ years** across Python, PHP, JavaScript and AI systems. Currently leading a cross-stack team at **PartyWitty** spanning four product surfaces — while personally shipping **1,186 commits in 4 months**. Builder of payment platforms, LLM pipelines and secure infrastructure, with a track record of measurable outcomes: **95% AI extraction accuracy**, **24M-record** scale operations, **4 payment gateways** unified, and zero-downtime security overhauls.

EXPERIENCE

Team Lead · PartyWitty

Mar 2026 — Present

India · Party & venue booking platform — React web, Flutter customer & partner apps, PHP/Node backends

- **Team leadership:** lead PHP, React, Node and Flutter developers across 4 product boards, while personally authoring **1,186 commits across 10 repositories** in 4 months — 48% of all engineering commits.
- **Platform ownership:** own the CodeIgniter 4 booking-and-payments backend (~75 controllers), authoring **87% of commits** (889/1,017) while reviewing and merging team changes for conflict-free releases.
- **Payments:** unified 4 gateways (Razorpay, Paytm, Easebuzz, Stripe) behind one checkout-verify flow; rebuilt Paytm S2S webhooks and made payout settlement atomic with corrected GST/TCS invoicing.
- **Wallet engine:** built PartyWittyPay, a co-funding wallet enforcing venue-platform shared discounts as one source of truth across Node and PHP, with auto-expiring sessions and advance + balance settlement.
- **AI delivery:** shipped 5 AI surfaces — call transcription & summaries (AssemblyAI + self-hosted Ollama) with daily per-agent digests, a WhatsApp AI bot built solo in one day, web AI chat, review moderation, resume screening.
- **Security:** drove a 46-point hardening overhaul in one week — global route middleware, centralized CORS, VPN-gated admin — then unified JWT customer sessions across React, Node and PHP.
- **Infrastructure:** solo-built an encrypted MySQL backup platform in Node.js — AES-256-GCM dumps to Cloudflare R2, TOTP MFA, tiered retention, one-click restore, audit logs and email alerting.
- **Customer surfaces:** 197 commits on the React app unifying 4 booking journeys into one card architecture; split the Flutter super-app into secure feature repos for safe external contribution.

Software Developer (AI / Full-Stack) · Nablacol

Feb 2022 — Feb 2026

New Delhi, India · AI document intelligence & CRM automation for US clients

- **AI document intelligence:** engineered OCR + GPT-4/Whisper pipelines for PDF and audio — **95% extraction accuracy**, 66% faster transcription, OpenCV selfie-ID verification.
- **CRM & workflow automation:** custom SugarCRM logic hooks and Apache Airflow DAGs (50% efficiency gain); WhatsApp/Facebook/TikTok integrations processing **100K+ monthly events** at 99.9% uptime.
- **Search & data migration:** Elasticsearch PDF search across 10K+ documents (40% faster retrieval); migrated **1.5M+ records with zero loss**; backfilled 400K+ legacy records.
- **Performance & stability:** cut server timeouts 47%, dashboard load 40% and memory 50%; Cloudflare rate-limiting blocked 95% of malicious traffic.
- **Scalability:** designed async task helpers cutting main-thread latency 40% and enabling bulk operations across **24M records**; zero-downtime delivery of 50+ features.

EXPERIENCE (CONTINUED)

Full Stack Developer • Quantum Leap

Jun 2018 — Feb 2022

Bengaluru, India • Enterprise web platforms

- **TATA management portal:** led end-to-end development of the ISO management system for TATA Consumer Products — adopted across **20 plants and offices** on annual contracts.
- Standardized management processes, cutting paperwork and operational costs; built audit tooling and a voice-command interface.
- Delivered full-lifecycle web applications for diverse clients using PHP, Laravel, JavaScript and SQL.

SKILLS

Leadership & Delivery

Team Leadership Code Review Architecture Design
Sprint / Trello Process Hiring & Mentoring

Frontend & Mobile

React Next.js Flutter / Dart TypeScript
Tailwind CSS Redux

Payments & Integrations

Razorpay Stripe Paytm Easebuzz
WhatsApp Cloud API OAuth 2.0 / JWT FCM
Twilio / MSG91

Backend

PHP (CodeIgniter 4, Laravel) Python (Django, Flask)
Node.js MySQL REST APIs WebSockets

AI & ML

OpenAI / GPT-4 Ollama (local LLMs)
AssemblyAI / Whisper OCR (EasyOCR, Tesseract)
YOLOv8 / OpenCV Elasticsearch

Cloud, DevOps & Security

Linux Administration Cloudflare (DNS, R2, CDN)
GCP AWS S3 Apache / Nginx VPN (Pritunl)
SSL Automation AES-256 / TOTP MFA Docker
CI/CD Apache Airflow

SELECTED PROJECTS

Encrypted DB Backup System — solo-built Node.js platform: AES-256-GCM encrypted MySQL dumps to Cloudflare R2, TOTP MFA, tiered retention, one-click restore, audit logging.

AI Call Intelligence — async pipeline transcribing every call-center recording (AssemblyAI) and summarizing via self-hosted Ollama; per-agent daily AI digests to leadership.

WhatsApp AI Concierge — Meta Cloud API bot with Dify AI conversations, per-user message queues and webhook-retry dedup — shipped solo in one day.

Horilla HRMS Rollout — company-wide Django HR system as sole author: geofenced face-verified mobile attendance, payroll, auto-checkout, work-record exports.

EDUCATION

Master of Computer Applications

Annamalai University • 2019 — 2021

B.Sc. Computer Science

Vels University • 2015 — 2018
